

Fuel Your Entire Fundraising Strategy

Fundraising intelligence that enables you to identify and cultivate donors with greater precision

iWave is the industry's top-rated fundraising intelligence platform. We've reimagined traditional wealth screening and donor research by delivering a modern, AI-powered solution that fuels your entire fundraising strategy—and unlocks the growth potential of any nonprofit.

Using the industry's most comprehensive data, iWave generates actionable fundraising intelligence that is tailored to your organization—so your team can go after the right donors with the confidence to make the right ask.

Fundraising intelligence shouldn't be slow, inaccurate, and unreliable. And no one should miss out on opportunities due to a lack of easily accessible wealth and philanthropic data.

The Paths to Smarter Fundraising

VeriGift

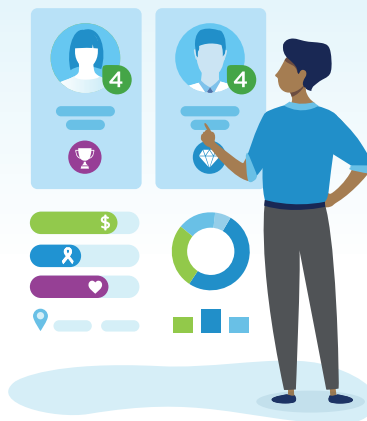

iWave's VeriGift is the world's largest and most up-to-date charitable giving database. With over 190M records, each linked to a source, it's the key to unlocking philanthropic history and affinity data.

It's time for a better way. It's time to let iWave help you turn your efforts into dollars that will maximize your impact.

Goodbye, Assumptions. Hello, Intelligent Fundraising.

Data modeling and analytics shouldn't be a black box — a “one-size-fits-all” system that lacks transparency and produces the same results for any nonprofit organization.

Your team deserves a fundraising intelligence platform that prioritizes prospects and donors according to your organization's projects and goals, provides visibility into the records and formulas used to generate modeling results, and accelerates all aspects of your organization's fundraising strategy.

Major Gift and Annual Giving

iWave offers all the tools for Major Gift Officers and annual giving teams to find the perfect donors, by ranking a prospect's gift potential based on their capacity, propensity, and affinity to your organization.

Planned Giving

Planned Giving Scores and Analytics provide a quick and easy way to focus your efforts on donors who are most likely to leave a legacy gift.

Foundation and Corporate Giving

The first of its kind, iWave's Foundation and Company Screening enables you to segment hundreds or thousands of foundations and corporations into a prioritized list with actionable insights to engage your top prospects.

Marketing Campaigns

Another industry-first innovation, iWave's Multi-Lens Scoring enables you to segment donors and tailor outreach for a hyper-personalized experience that results in maximizing donations.

Our Commitment to Security and Privacy

iWave has best-in-class security and privacy capabilities. We comply with security standards as well as industry-specific regulations such as HIPAA, SOC-2, CCPA, and GDPR.

See how the industry's top-rated fundraising intelligence platform will help you fundraise with confidence and raise more major gifts, faster.
